To: Docket No. 12231

On February 11, 2003, Chris Scott, a representative of DataDot Technology Ltd., (DataDot) met with NHTSA to discuss its vehicle identification technology. Initially, DataDot's interest in presenting its technology was prompted by an NPRM for the Federal Motor Vehicle Theft Prevention Standard, published on June 26, 2002. However, the meeting took place with the understanding that the NPRM comment period ended on August 26, 2002, and that the actual purpose of the meeting would be limited to introducing NHTSA to the new vehicle identification technology. Attendees from NHTSA were Noble Bowie, Rosalind Proctor, Deborah Mazyck, Carlita Ballard, Deirdre Fujita, and George Feygin.

During the meeting, the DataDot representative made a short video presentation, followed by a brief display of the technology utilized by the company. Mr. Scott Distributed copies of a DataDot discussion paper and reviewed its contents. A copy of the discussion paper can be obtained by contacting me, in the Office of the Chief Counsel (Telephone: 202-366-2992) (Fax: 202-366-3820). My mailing address is George Feygin, National Highway Traffic Safety Administration, NCC-112, 400 Seventh St., S.W., Washington, DC 20590.
